Fundamentals of Career Development Theories

The purpose of this online, self-paced course is to offer skills and knowledge to career development practitioners to assist students and clients through the lens of career development theory. During the course you will review traditional and emerging career development theories, models, and strategies. Using these models and strategies, the course develops participants' abilities to work constructively with students and clients to build individualized career plans. Participants will develop/enhance their knowledge of career development theories and enhance their skills in applying these theories with clients.

Upon successful completion of this course, you will be able to:

- Demonstrate an understanding of traditional and emerging vocational counselling theories
- Demonstrate an understanding of various vocational counseling models and frameworks
- Assist clients in a theory-based process of self-discovery, self-esteem building, and realistic goal setting

Your instructors: Deirdre Pickerell and Roberta Neault
